FLAME App Press Release

24 August 2013

Sonuus FLAME App Launched

Sonuus Limited's new precision "FLAME" guitar tuner is now available as an App for iPhone®, iPad® and iPod touch®.

Utilising Sonuus' acclaimed pitch detection algorithms, the FLAME tuner combines an ultra-responsive, very accurate chromatic tuner with an innovative flame-like tuning display.

Housed in a sleek and modern UI, FLAME is able to tune most instruments, including guitar and bass guitar, with a wide note detection range spanning from E1 (low E on a 4-string bass) to Bb6 (higher than a 24 fret guitar can play). Chromatic note detection ensures that any note can be tuned, regardless of the tuning of your instrument.

The FLAME tuner was first seen in the Sonuus G2M app for iOS and is now available as a separate app for \$0.99 (£0.69).

Available on the Apple App Store:
