Voluum Press Release

04 April 2013

Voluum — the analogue volume manipulator.

Sonus Limited announce Voluum: their newest stomp box for guitar and bass with multiple effects for controlling and modulating signal level.

Voluum features a high-quality fully-analogue signal path with digital control to give you uncompromised signal quality combined with precision control and unrivalled possibilities. Extreme headroom minimises unwanted distortion and guarantees clip-free operation.

Housed in the same "tank-like" case as the Sonuus Wahoo, Voluum is perfect for gigging. While USB and MIDI connectivity ensure Voluum is also studio-friendly.

Sonus are keen to show the new pedal to retailers and to enthusiastically listen to any suggestions you may have: the design is not yet set in stone! As a thank you, all retailers who give us a business card at MusikMesse will be entered into a prize draw to win a free Sonuus Wahoo.

Voluum will be revealed at Frankfurt MusikMesse 2013 Hall 4.0 Stand B51 (with Sonuus' distributor Peterson Electro-Musical Products, Inc).

Sonus Limited is a music products company, based in the UK. Established to exploit new technologies to create desirable products at sensible prices, Sonuus is focused on providing musicians with solutions that are better, simpler, or more affordable than anything else available on the market today.
