Wahoo Quick Start Press Release

13 January 2014

Wahoo — a new quick start video guide

Sonuus Limited have released a new quick start video guide for their Wahoo wah/filter pedal.

The Wahoo is a dual analogue filter stomp box where each filter can be configured as low-pass or band-pass and operate independently in wah pedal, envelope, LFO, and pitch-tracking modes. The warm-sounding fully analogue signal path is digitally controlled for precision, configurability and adaptability.

Analogue with the convenience of digital: the Wahoo has 100 expertly-crafted factory presets and can store 100 user presets, allowing instant access to your favourite settings. With on-pedal control for instant tweakability and a USB connection for software editing and MIDI automation, the Wahoo is the perfect solution for the performing musician.

The depth and breadth of possible sounds you can get from the Wahoo can be daunting to some musicians who are used to having much more limited possibilities from their wah/filter effects. The quick start video guide shows how easy it is to use the Wahoo and to start tweaking sounds.

The quick start video guide can be found here: <http://youtu.be/BWwRwRqfja4>

Sonuus Limited is a music products company, based in the UK. Established to develop and exploit new technologies to create desirable, innovative, products at sensible prices, Sonuus is focused on providing musicians with solutions that are better, simpler, or offer more value than anything else available on the market today.
